

PET FOOD LABEL MODERNIZATION

At Midwest Laboratories, we are constantly striving to expand our analytical services to better support the needs of our clients and help them succeed in an evolving market.

We are excited to announce that in response to the recent updates to the AAFCO guidelines, we have expanded our service offerings to include designated packages designed to meet the Pet Food Label Modernization (PFLM) requirements.

For large volume projects including Total Dietary Fiber testing, please reach out to your Account Manager for a projected project turnaround time.
